

**Thank-you for Participating in the  
The Jackson Hole Clean Up & in Our Data Collection Effort!**

**Why do it?** Clean ups help to reduce the amount of litter entering our waterways, and your data will help make a difference. Data will be used to help us recognize litter type, abundance and distribution patterns in Jackson so that we can best implement effective solutions. Central Wyoming College and Straw Free Jackson Hole (SFJH) have partnered up to organize and/or collect data from clean ups in Jackson because we are committed to protecting the environment and ensuring that Jackson and the downstream areas remain a thriving ecosystem for all.

**Please complete the data sheet and either:**

- a) Return to a representative at the location where you picked up your clean-up materials  
OR
- b) Take a picture/ scan it and email to [Julie Deardorff \(strawfreejh@gmail.com\)](mailto:julie.deardorff@strawfreejh@gmail.com)

Before you get started there is some important information that we need from you to help us to best interpret the data.

**Important - please fill out this information!**

Type of cleanup (circle): in creek, along creek, along roadway/pathway

Exact location cleaned: \_\_\_\_\_

Current Weather: \_\_\_\_\_

Start time: \_\_\_\_\_ End time: \_\_\_\_\_

Recent weather or human events: \_\_\_\_\_

Your name(s) or organization: \_\_\_\_\_

# of people who worked on this form: \_\_\_\_\_

If you are interested in participating in additional clean ups, please reach out to Julie.

We will post the data findings on Straw Free JH's website: [strawfreejh.org](http://strawfreejh.org).

  @StrawFreeJH / STRAWFREEJH@GMAIL.COM / (307) 201-1353

**THANK-YOU! YOUR CLEAN UP AND DATA COLLECTION ARE MAKING A DIFFERENCE!**

The JH Clean Up form is a modification of the Rozalia Short Clean-Up Form;  
[www.rozaliaproject.org](http://www.rozaliaproject.org)
